SUMMARY

AWS Cloud/ DevOps Engineer with hands-on experience building scalable cloud infrastructure, serverless applications, CI/CD pipelines, and three-tier web applications using AWS services. Skilled in AWS IAM, VPCs, CloudFront, Lambda, API Gateway, DynamoDB, Terraform, Docker, GitHub Actions, and Infrastructure as Code (IaC). Strong foundation in networking, cloud security, Linux administration, and automation. Holds AWS Solutions Architect Associate (SAA), CompTIA Security+, and Network+ certifications.

TECHNICAL SKILLS

Cloud & AWS: AWS EC2, S3, IAM, VPC, Route 53, CloudFront, Lambda, API Gateway, DynamoDB, RDS, CloudWatch, Auto Scaling, ELB, SNS, SQS, Event Bridge, CodePipeline, CodeBuild, CodeDeploy

DevOps & Automation: Terraform, Docker, GitHub Actions, CI/CD Pipelines, Infrastructure as Code (IaC), Linux, Bash, Git, YAML, JSON

Programming & Scripting: Python, Boto3, JavaScript, HTML, CSS

Networking & Security: TCP/IP, DNS, VPN, Security Groups, IAM Policies, MFA, Access Control, Cloud Security, Identity & Access Management

Support & systems: Windows 10/11, Windows Server, Active Directory, Password Resets, Remote Desktop (RDP), SSH, Ticketing Systems, Troubleshooting, Documentation

EXPERIENCE

Application Support & Customer Services

March 2020 – April 2021

Employment Solutions

- Resolved account access, password reset, and scheduling issues by troubleshooting user accounts, improving resolution efficiency by 30%
- Verified user identities and processed healthcare service approvals, reducing workflow delays and improving customer support response times
- Troubleshot technical and application-related issues while maintaining compliance with privacy and security standards
- Documented incidents and resolutions to improve escalation accuracy and service consistency

Returns & Technical Support Associate

Jan 2019 – March 2020

BrandsMart USA

- Provided hands-on technical support for customer electronics, including device resets, basic configuration, and troubleshooting
- Assisted customers with computer setup, restoration, and connectivity issues
- Explained technical issues clearly to non-technical users, improving customer satisfaction and resolution time

PROJECT

Cloud Resume website

AWS, Terraform, GitHub Actions, Docker, Linux

- Built a serverless cloud resume platform using AWS and DevOps technologies
- Configured S3, CloudFront, and Route 53 for secure global website hosting
- Developed backend functionality with Lambda, API Gateway, and DynamoDB
- Automated infrastructure deployments using Terraform and GitHub Actions
- <https://platform.nathan-resume.com/>

EDUCATION

Western Governors University

M.S. in Information Technology Management

Salt Lake City, UT

May 2026–current

Western Governors University

B.S. in Information Technology

Salt Lake City, UT

Dec 2025

CERTIFICATIONS

- AWS Certified Cloud Practitioner
- CompTIA Security+
- CompTIA Network+
